📍 Pune, India

Professional Summary

MBA candidate with hands-on experience across operations, analytics, sales, process improvement, digital content, and AI tools. Experienced in managing inventory, coordinating field operations, analyzing workflows, and using digital tools to improve everyday business processes.

Professional Experience

Operations Executive, IOWeb3 Technologies 04/2026 – 05/2026 | Pune, India

- Coordinated field workforce, site activities, and daily video data collection across assigned project locations
- Developed SOPs and training guidelines for onboarding and training a constantly rotating field workforce
- Managed data quality checks, daily recording hour targets, and operational reporting using Excel and Google Sheets

Process Optimization Research Intern, Bright LumiTech Private Limited 02/2026 – 03/2026 | Hybrid, Pune

- Analyzed a 5-stage engineering workflow through employee discussions, information gathering, and process mapping
- Identified the design phase as the primary bottleneck, accounting for approximately 60% of workflow time
- Applied Fishbone Analysis and contributed to standardized intake templates, SOPs, and process documentation

Inventory & Sales Executive, Self-employed 06/2024 – 08/2025 | Manchar, Maharashtra

- Managed 14K+ SKUs using BUSY 21 ERP, including barcode, part number, MRP, shelf, rack, and reorder-point tracking
- Handled retail sales and customer relationships, regularly serving customers and garage owners
- Conducted targeted physical audits and reconciled stock discrepancies using BUSY 21 ERP and Excel

Projects

Pinterest Content Growth & AI Automation 04/2023 – Present

- Built and grew a photography-focused Pinterest account through organic content, Pinterest SEO, keyword optimization, and audience insights, reaching 1.2M+ peak monthly views
- Analyzed content performance and audience preferences to identify high-performing themes and refine content strategy
- Built BoardMaster, an AI-powered Pinterest automation tool designed to streamline content management and reduce repetitive posting and optimization work

CandidatePro - AI Job Application Platform 07/2026 – Present

- Developed an AI-powered job application system that generates JD-tailored resumes, cover letters, research briefs, and interview preparation
- Integrated Claude API and prompt engineering to customize outputs based on job requirements and candidate experience
- Built a structured JD analysis and resume-generation methodology covering keyword alignment, relevance scoring, section prioritization, and quality checks
